

ENERGY MANAGEMENT POLICY

3Teks Medical Textile aims to implement and develop proactive energy management based on sustainable development in all its activities. Today's energy use is already shaping designs that will last for the next century.

In this direction, as 3Teks Medical Textile;

- Efficient use of energy and natural resources in all our activities,
- To apply environmental and energy-friendly technologies in our new projects and equipment purchases, and to implement energy efficiency as one of our evaluation criteria in purchasing products and services,
- To save energy and reduce the consumption of natural resources by making efficiency-enhancing improvements in our existing processes and systems,
- To set goals and objectives to continuously improve energy efficiency and to review them regularly; To prevent inefficient energy use,
- To carry out our activities within the framework of corporate standards, to integrate applicable rules and standards into our processes by following all legal regulations related to energy management, efficiency programs developed on national / international platforms; To fulfill our obligations imposed by legal regulations,
- We will leave a livable world to future generations by following a sustainable policy by taking the necessary precautions against greenhouse gases and global warming,
- Awareness of energy efficiency and saving will be increased by providing continuous training to our employees,
- To contribute to the awareness and development of all stakeholders by understanding the needs of all stakeholders by encouraging multi-faceted communication,
- To provide the necessary resources by the senior management in order to carry out the activities within the scope of the Energy Policy,
- The policy is reviewed at regular intervals and updated when necessary.

We are committed.

General Manager
